

01 December 2021

To whom it may concern:

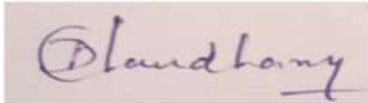

I am pleased to recommend Ms. Aishwarya Bhargava for her upcoming journey at your organization. I was associated with her closely for a year during which she worked at the Enterprise Asset Management Department at **Utopia Global Inc. (Prometheus Group Company)** as an RPA Developer. Based on my direct observation and assessment of her skills, I am going to highlight the key skills she has that will make her a good candidate for this program.

Aishwarya, right from the beginning of joining as an RPA developer, has been an extremely valuable asset to our organization. She started with building automations that were internal projects, which helped to save a lot of time for the different departments in our organization and also for the external client for whom those teams worked. Among all of the projects she has worked on, she has been involved in many such projects such as DHA in a Box, Bot for Data Extraction from Excel for Indorama, Creating for Table Report, and Extraction of data from JPG Bot. In all of these, she developed them solely from scratch wherein I was impressed by the trajectory of the work she followed since she not only was responsible for gathering requirements and developing but also for testing and the final deployment, which she did was commendable. Especially for her project "DHA in a box", she had to spend a huge amount of time developing that automation, and she achieved this without any bugs. For her good work and effort, she has been praised by her seniors quite often and has also received an award for this.

I can corroborate that Aishwarya has a good working knowledge of UiPath Knowledge and Robotic Process Automation Technology knowledge. Furthermore, she was extremely keen on learning new things and therefore was constantly on the lookout to excel and upscale, which is a praiseworthy trait to have. That being said, she can work well within a team by virtue of her strong interpersonal and communication skills but also knows how to set herself apart from the crowd through her work. With an ability to work independently and with minimum supervision, she truly was a very reliable and supportive teammate over the entire duration of our association. Her exceptional performance was further enhanced by her strong work ethic and personality, and also her adaptability to the work environment and accountability. As an exceptional RPA developer, her attitude brought a lot of optimism to the team in general, and all in all, she showed great promise while being associated with us, and had a good proficiency that she will bring with her to your graduate program.

From what I have seen of Aishwarya throughout the time we have been associated together, I can confidently say that she will be a great addition to any organization that she joins simply because she is immensely motivated and dedicated. Therefore, I strongly recommend her to you and wish her the best of luck in all her future endeavors. Please feel free to contact me at the undersigned contact information if you require any further information about this recommendation. I will be happy to help.

Best Regards,

Deepak Chaudhary

Her former Manager at Utopia Global Inc. (Prometheus Group Company) (EAM Dept.)
